

## MDL 180 air humidifier

The MDL 180 is a compact, fast and easy to install high pressure- humidifier. The design of this extremely advanced air humidifier, it is focused on the quality and the ease of installation. The MDL 180 produces a highly refined mist that evaporates quickly in the room. The intern fan takes care of air support to quicken the evaporation process and to optimize the distribution. The humidifier can be easily installed on a new or existing high pressure system.

## characteristics

- executed with six high pressure nozzles
- suitable to nebulize softened-, RO-, or drinkwater
- low in energy consumption
- maintenance friendly

## Specificaties

Type	Capacity at 70 bar	Minimal montage height	Minimal distance until The ceiling	throw
MDL 180/3	18l/u	4 meter	1 meter	Ø 8 meter
MDL 180/4,5	27l/u	6,5 meter	1 meter	Ø 10 meter

## Technische gegevens

dimensions Ø x h	: 43,5 x 14 cm
weight	: 6,5 kg
supply voltage	: 230Vac +5% tot -10% 50Hz
Electrical link	: Alleen netvoeding via WCD
Absorbed power	: 78W
Water connection	: 6 mm
Work pressure	: 60 tot 90bar
Sound level	: 65dB(A)

\* measured at 2 meter under the unit
