ElkaFog® humidification for small workshops or large factories.

# No Shrinking, Wavy, Or Cracked Wood!

For more information, please visit [www.elka-air.nl](http://www.elka-air.nl).

## Humidification In The Wood-Processing Industry.

The materials you work with in the carpentry industry must be in a room with the **correct relative humidity**. The consequences of too low relative humidity can be **shrinking battens, wavy boards, and cracked beams**.

The SKH states that the relative humidity in your production area should be 55% to guarantee quality.

In our Dutch climate, humidification is, therefore, an absolute must for the woodworking industry.

Elka Air is a total supplier of industrial humidifiers and can provide your company with excellent custom-made advice. Whether it concerns **a small carpentry workshop** or **a large factory** with various departments, our specialists are happy to come and advise you on the best humidification for your needs.

**The cost.  
Every situation is different! For this reason, we only deliver custom-made solutions.  
Contact us for an obligation-free offer.**

## The Advantages Of Our Humidification In Your Carpentry Shop:

- ▶ Promotes dimensional stability.
- ▶ Allows for less sanding between the primer and topcoat.
- ▶ Limits the shrinking, cracking, and warping of the woodwork.
- ▶ Limits the amount of particulate matter in the area.
- ▶ Prevents static electricity.
- ▶ Paint flows and dries better.

### ElkaFog® a specialist in all types of humidification

As a supplier of compressed, high-pressure, steam, and ultrasonic humidification, Elka Air's specialists can anticipate your requirements like no other. We would be happy to discuss the pros and cons of the various humidification systems with you to help you make the right choice.

### Maintenance & Safety

To avoid risks, Elka Air humidifiers are always equipped with a water standstill monitor. As a result, only cold drinking water is used, and no dead pipes are included in the system. In addition, we offer a maintenance service so that your system is checked annually.
